CMapsplugin

For SAP BusinessObjects Dashboards

CMaps Plugin is Centigon Solutions' 4th generation geographic analytics designer for SAP BusinessObjects Dashboards (formerly Xcelsius). CMaps Plugin (formerly GMaps Plugin) transforms a consumer friendly map experience into a powerful enterprise location intelligence tool without a reliance on expensive server software, GIS system, or coding. Customize map drill-down and visualization to your business requirements for any industry or line of business and instantly deploy to business users.

"CMaps Plugin provides timely and cost effective location analysis. It's chocked full of features which help my customer visualize new trends in their data."
John Gresham
Yamaha Motor Corporation, USA

"CMaps Plugin has consistently proven to be a favorite among our customers as a must have mapping solution for dashboards. We don't offer dashboards without CMaps Plugin!"
Mico Yuk- CEO
Benchmarkers

Integrate

Drag and drop CMaps Plugin directly into your dashboard and then connect your geographic visualization to SAP BusinessObjects environment with point and click ease.

Visualize

Visualize and navigate any combination of geographic regions, territories, assets, events, heat maps, and anything else you can imagine combined with your secure business information.

Analyze

Connect, drill, and analyze business information within a consumer friendly interface. Your business users can now benefit from location intelligence without training or installing any software.
